Other: Philanthropic Partnerships, President's Discretionary Fund, Seed Funding/Responsive Awards, other	\$1.5	28

focus area highlight

Breaking the Cycle of Domestic Violence:

We are listening, learning, and gathering input from communities throughout California to identify what drives the perpetuation of domestic violence, uncover what's being done and what works, and define our role in addressing its root causes.

Collaborating for Healthy Communities:

We believe that by connecting multiple systems and movements, and bringing more community voices to the table, we can generate greater collective impact and build healthier futures for generations to come.

Designing the future of Health:

Greater investment is needed in sustainable strategies that address the root causes of poor health and domestic violence and promote strong families, healthy relationships, and community well-being.
